- and more (see next page)

Combination of the best!

Features of our TransPlay™ Technology

- **360° Viewing Experience** - Because our technology features a clear screen, you can view it from any angle
- **Clear + Thin + Light + Flexible** - Equals a number of applications only limited by your imagination
- **Adjustable display size** - Go as large or small as you want
- **Compact projector** - Fits in the palm of your hand
- **Homogeneous, non-pixelated screen** - Because we are projection based, the picture is always crisp and clear
- **Low cost components** - Film, projector, and that's it!
- **High quality image on emissive display screen** - MediaGlass™ (clear or black)
